

MUHAMMAD ASAWIR

MERN STACK & FULL-STACK SOFTWARE DEVELOPER

Rawalpindi, Pakistan • 0310-5410322 • muhammadasawirkhan@gmail.com • [linkedin.com/in/muhammad-asawir-khan](https://www.linkedin.com/in/muhammad-asawir-khan)

PROFESSIONAL SUMMARY

Results-driven MERN Stack Developer and Full-Stack Software Developer with hands-on experience building scalable web applications using MongoDB, Express.js, React.js, Node.js, and Angular. Proficient in RESTful APIs, CI/CD pipelines, and web application performance optimization. Strong problem-solving skills and attention to detail with a collaborative, team-first mindset. Experienced in Agile/Scrum methodologies, code reviews, and mentoring junior developers. Adept at responsive UI/UX design, API integration, deployment practices, and full-stack development in fast-paced team environments.

TECHNICAL SKILLS

Frontend:	React.js, Next.js, Angular 17, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Responsive UI/UX Design
Backend:	Node.js, Express.js, RESTful APIs, JWT Authentication, bcrypt, Role-Based Access Control (RBAC)
Database:	MongoDB, PostgreSQL, Mongoose, SQL
DevOps & Tools:	Git, GitHub, CI/CD Pipelines, Postman, VS Code, Multer, Stripe, Nodemon
ML / AI:	Python, XGBoost, scikit-learn, pandas, OpenAI API (GPT-4o-mini), Google Colab
Methodologies:	Agile, Scrum, Code Reviews, Technical Troubleshooting, Team Environment Collaboration

PROFESSIONAL EXPERIENCE

Octaloop IT — Full-Stack Developer (MERN Stack)	January 2025 – Present
• Architected and deployed 4+ responsive web application modules using React.js, ensuring cross-browser stability and mobile-first responsive UI/UX across all devices. • Built and integrated 6+ RESTful APIs and third-party services, reducing frontend-to-backend data latency and improving overall web application performance optimization. • Optimized backend architecture with Node.js and MongoDB (MERN Stack), accelerating database response metrics by 25% for platform analytics dashboard engines. • Engineered a centralized, reusable UI component library using Tailwind CSS, reducing redundant codebase styling by 20% across commercial software applications. • Implemented CI/CD pipelines and followed deployment practices to streamline software delivery and reduce release cycle time. • Conducted code reviews, wrote clean, well-documented code, and mentored junior developers on full-stack development best practices in an Agile/Scrum team environment. • Resolved 15+ critical state management bugs through systematic technical troubleshooting while compiling full API documentation to optimize engineer onboarding.	

PROJECTS

Endovascular Procedure Decision Support System (EPDSS)

Angular 17 | Node.js | PostgreSQL | XGBoost | OpenAI API

- **Designed a full-stack clinical platform** using scalable web application architecture with secure multi-role JWT authentication and role-based access control (RBAC).
- **Engineered dedicated Admin and Doctor single-page interfaces** using Angular 17 with component-based architecture, connected to a high-throughput Node.js RESTful API.
- **Implemented an automated document processing pipeline** with Python, XGBoost classification models, and OpenAI API (GPT-4o-mini) integration for intelligent clinical decision support.
- **Applied web application performance optimization techniques** and ensured responsive UI/UX across all devices and screen sizes.

Responsive Dashboard Components

React.js | Node.js | MongoDB | Tailwind CSS

- **Built dynamic UI visualization modules** with integrated RESTful API pipelines enabling responsive, fluid data rendering; part of a collaborative full-stack MERN Stack project.
- **Optimized browser bundle delivery** and web application performance through strategic frontend chunking, dynamic code splitting, and deployment best practices.
- **Participated in code reviews** and collaborated closely with cross-functional team members including designers and QA engineers in an Agile team environment.

EDUCATION

National University of Modern Languages (NUML)

Sept 2022 – June 2026

Bachelor of Science in Computer Science (BSCS)

Rawalpindi, Pakistan

KEY COMPETENCIES

MERN Stack Development • Full-Stack Development • Scalable Web Applications • RESTful APIs • API Integration • CI/CD Pipelines • Web Application Performance Optimization • Agile/Scrum • Problem-Solving Skills • Attention to Detail • Collaboration • Mentoring • Communication • Code Reviews • Responsive UI/UX • Deployment Practices • Technical Troubleshooting • Team Environment Collaboration • Evening/Night Shift Availability
